Join a graduate school dedicated to the health professions

Welcome! MGH Institute of Health Professions sets the standard for exceptional post-baccalaureate and post-professional graduate education in the health sciences. As a graduate school founded by Massachusetts General Hospital and as the only degree-granting affiliate of Partners HealthCare, the Institute offers unparalleled opportunities for students to learn and work alongside expert practitioners in a variety of hospital, clinical, and community settings.

Through our unique IMPACT Practice® program, the Institute offers the advantage of an interprofessional approach to learning, giving you the competencies needed to be a leader in your field and an effective member of a high-performing health care team.

Post-baccalaureate programs are designed for students seeking their first professional degree in a chosen health field. We welcome applications into our rigorous, learner-centered programs from students who have earned a bachelor's degree in any field. Prerequisite coursework is required, and may be satisfied either through your undergraduate work or supplemental coursework.

Post-professional programs are designed for working professionals who seek advancement in their careers.

Attend an info session or register for a webinar at www.mghihp.edu/info.
